(Workshop Mail Server,
High Availability Server,
Data Cloud)

About GLiB

GNU/Linux Bogor, GLiB is a community or movement in the field of Information and Community Technology (ICT) with the main focus utilization in empowerment of the operating system GNU/Linux and free software and open source also promoted FOSS to general public.

History of community linux Bogor start from some people in Bogor like Michael Sunggiardi (Bogor Internet), Mohammad Anwari (BlankOn Project), Yanmarshus Bachtiar, Utian Ayuba and etc. They try to discuss on online forum KPLI Bogor 1998-2000. GNU/Linux Bogor transformation from KPLI Bogor started on May 20, 2014.

GLiB is the most active grass-root open source event in Bogor. Last June, we created event Kodekepo, Kodekepo workshop was organized by GLiB and MICRO IPB. A discussion with author programmer GNOME 3 App Development followed by 200 participants. In GLiB, we try to sharing knowledge and invite more people to using open source software.
