GNOMETM ASIA
summit 2015
May 7-9, 2015 | Depok, Indonesia

"We are looking forward to welcome the GNOME community to Indonesia, a country that has a large Free and Open source community, we are excited that they will gather for GNOME.Asia Summit 2015" said Estu Fardani, a member of the local organizing team.

The GNOME.Asia Summit 2015 will provide a unique opportunity for stakeholders to discuss Free and Open Source Software solutions, programming, promotion and challenges for GNOME, but also other Asian free software communities face while growing. Besides being a community event, the summit is set up to function as a gateway for companies interested in Asian markets.

We are offering sponsorship partnership for the event.
As a sponsor, you are offered:

- Matchmaking opportunities with local enterprises, which will be invited to a business session;
- Marketing opportunities featured in conference materials and presented in media announcements;
- Networking with highly capable developers and welltrained students.

We are expecting about 500 participants with delegates from Asia and around the world. The GNOME.Asia Summit is a unique and international conference which offers sponsors the chance to tap into fast growing local markets, discover new business opportunities, and increase awareness for their products among early adopters and technology multipliers.

Universitas Indonesia (UI) will be the location of the organizers of this event. UI is the largest university and one of the first university in Indonesia. UI was founded in 1849 and represents the most experiencing educational institution in Asia. UI has the FOSS community and good development environment FOSS with fully supported by the university. Furthermore, UI campus is one of the most magnificent green campuses in the world. UI has two campuses; one is in the central business in Jakarta (Salemba) and the second one is located in Depok areas (West Java). Depok campus is a green campus covering 320 hectares. UI maintains the ecology conservation by utilizing only 25 percent of area for academic, research and student activities; while up hold 75 percent for forestation.
